

**Technologies with care and love  
for the future of agriculture**

# About us

Agrovent is a dedicated team of agribusiness experts ready to support you throughout your project development. Since our foundation in 2006, we have successfully completed over 1500 projects globally. Our solutions have led to the production of more than 2 million tons of meat. Additionally, we have saved over 20 million tons of crop production through our innovative approaches.

A background image showing two men standing in a lush green field. The man on the left is wearing a yellow tank top and a white shawl, looking at a laptop held by the man on the right. The man on the right is wearing a white shirt, a red tie, and glasses, gesturing with his hand while looking at the laptop. The field is filled with green plants, and the background is a dense forest.

# We create innovative solutions to help you build a sustainable agribusiness for the world's food security

## Hystory

We started our way in 2006. During this time we have built the most convenient process of cooperation for each client. We are constantly looking for improvements to create optimal and controllable microclimatic conditions where control of air quality, humidity and temperature is essential

## High results

Agrovent climate systems help our customers to achieve predictable and high performance results in agro-industrial facilities, be it poultry farms or fruit storage

## Plan

A detailed plan, painstaking work, attention to the nuances of each object — this is Agrovent's way to create an ideal microclimate. And the result of the work — ideal conditions for keeping and raising animals, as well as storing crops

Our company's mission is to  
constantly search for **technological**  
**ways** of farming in the field of  
**poultry, livestock and plant breeding**  
**conditions**

# When you turn to Agrovent, you get an individual project, thought out to the last detail

The knowledge and unique experience that our employees have accumulated are translated into industry-specific solutions that significantly increase the efficiency of our customers' livestock farms and storage facilities

Each facility is unique, so Agrovent is equally able to offer you

## Competencies

In-depth competencies in business development, and full information support in building production, logistics and distribution chains

## Technologies

Modern technologies of designing microclimate systems for storage of crop production, poultry and livestock

## Service

We will carry out the start-up of the facility, provide service support, and train your employees

## Equipment

Wide range of equipment (including production of non-standard equipment "under the project")

# Every agricultural facility is unique, but we're always easy to work with

## Design engineers

We offer developments that allow you to create efficient facilities. We provide all necessary technical support and consultations at all stages from concept to implementation

## Investors

We help to assess and minimize risks by providing detailed analytical reports. We conduct a thorough market analysis in order to suggest the most promising investment areas

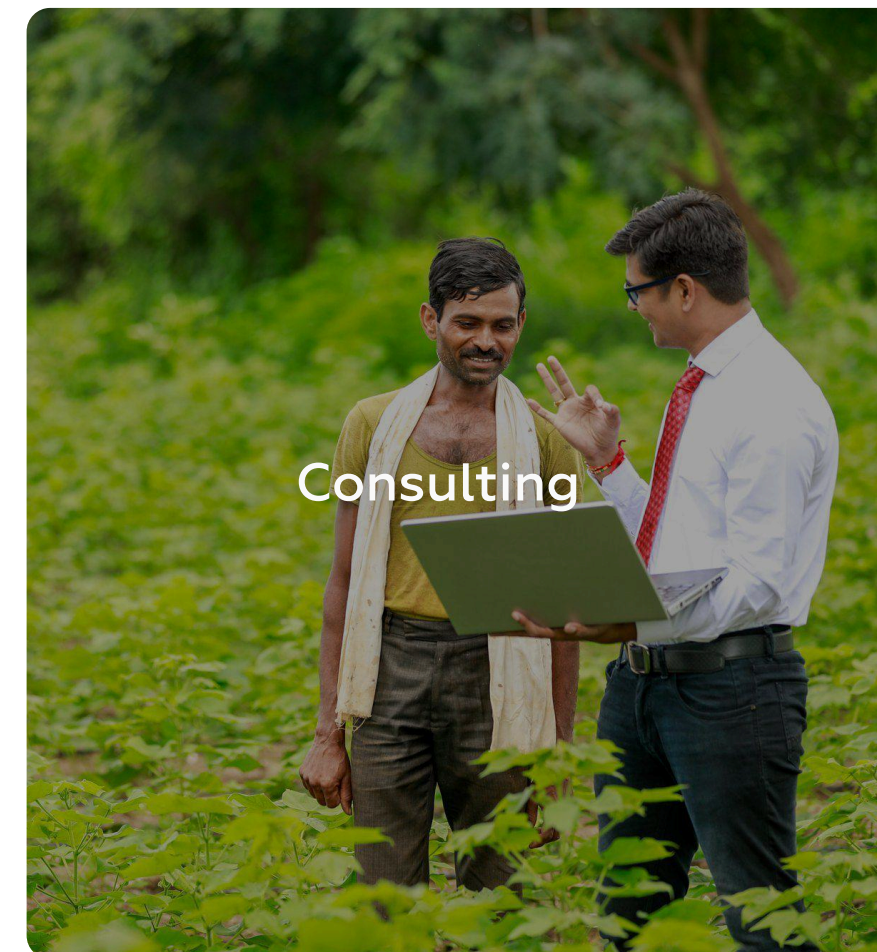

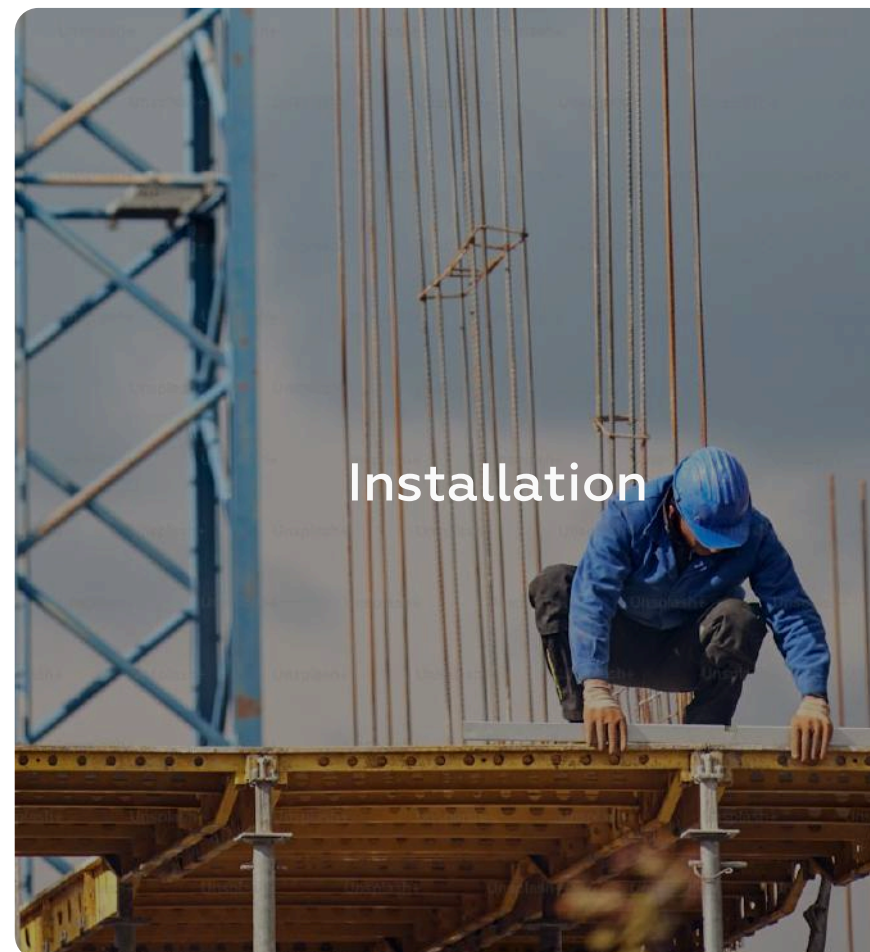

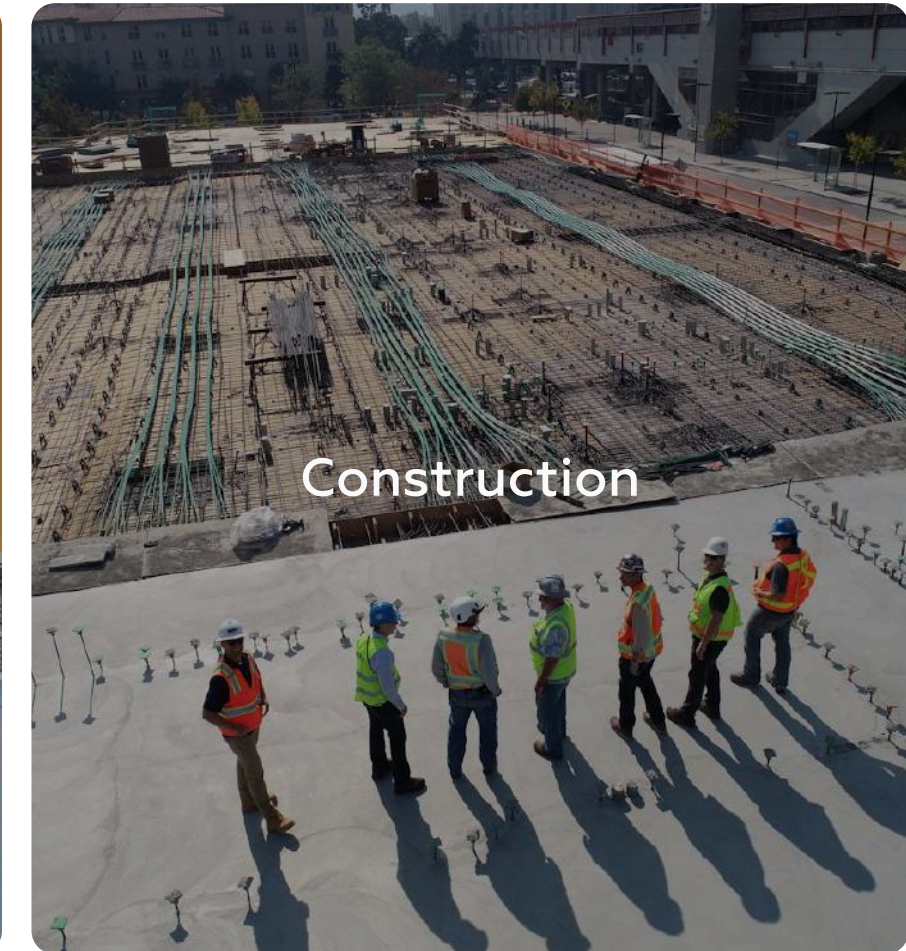

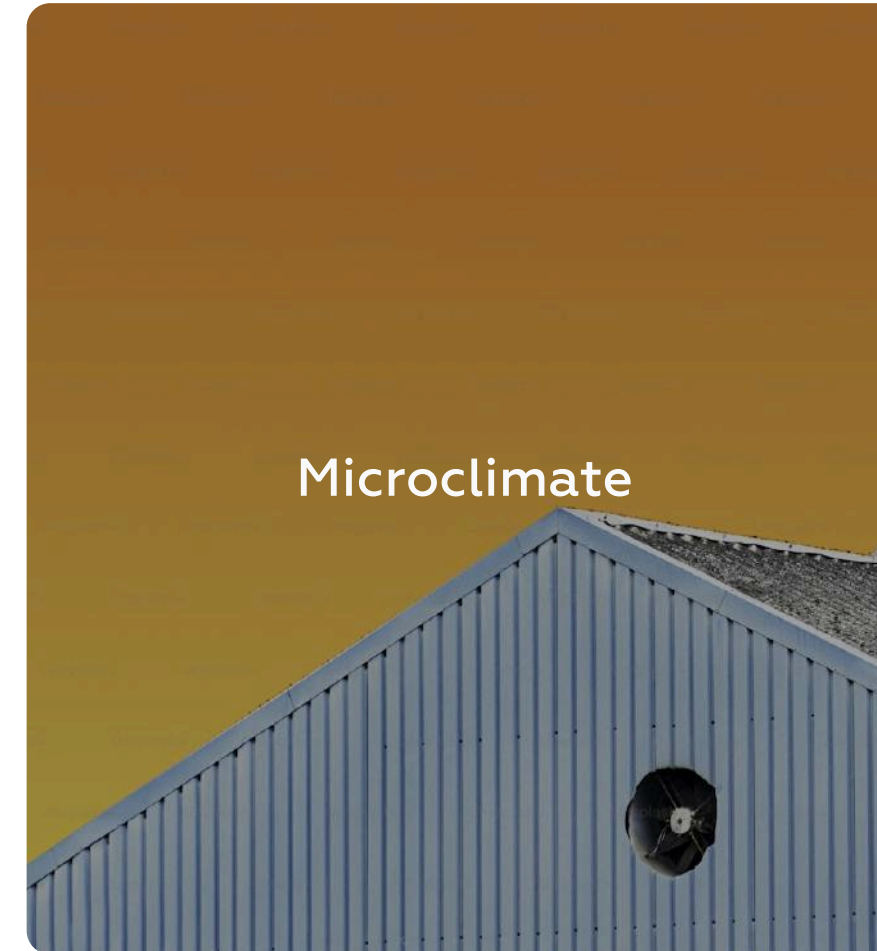

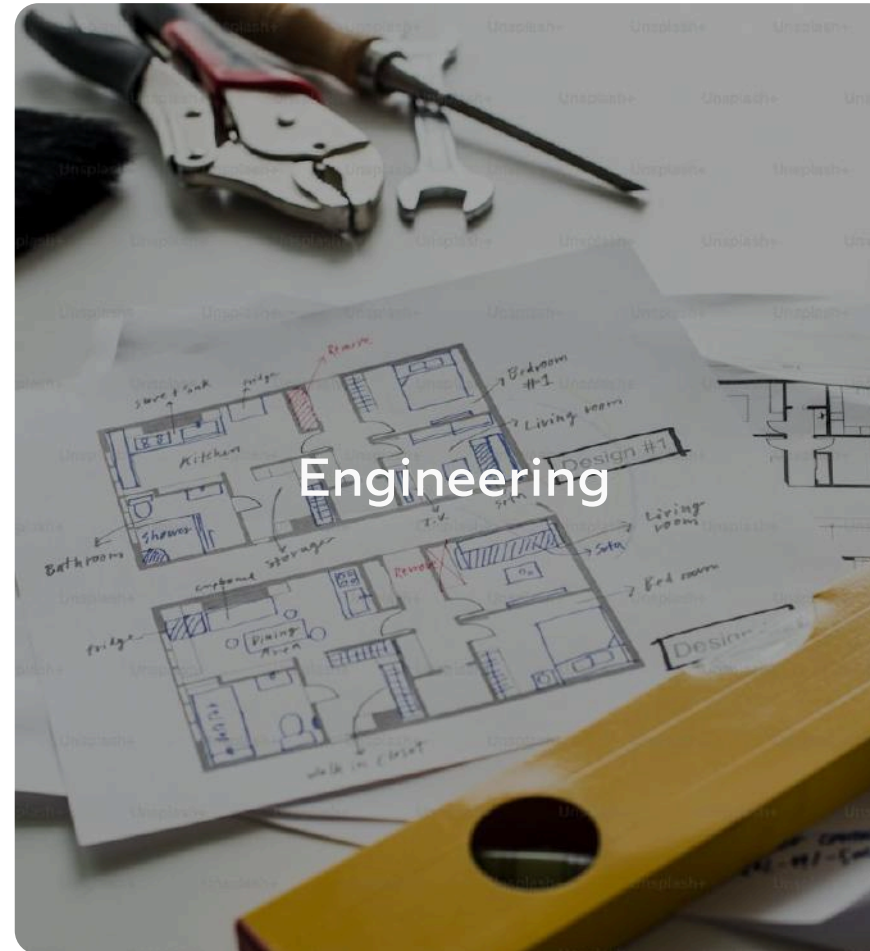

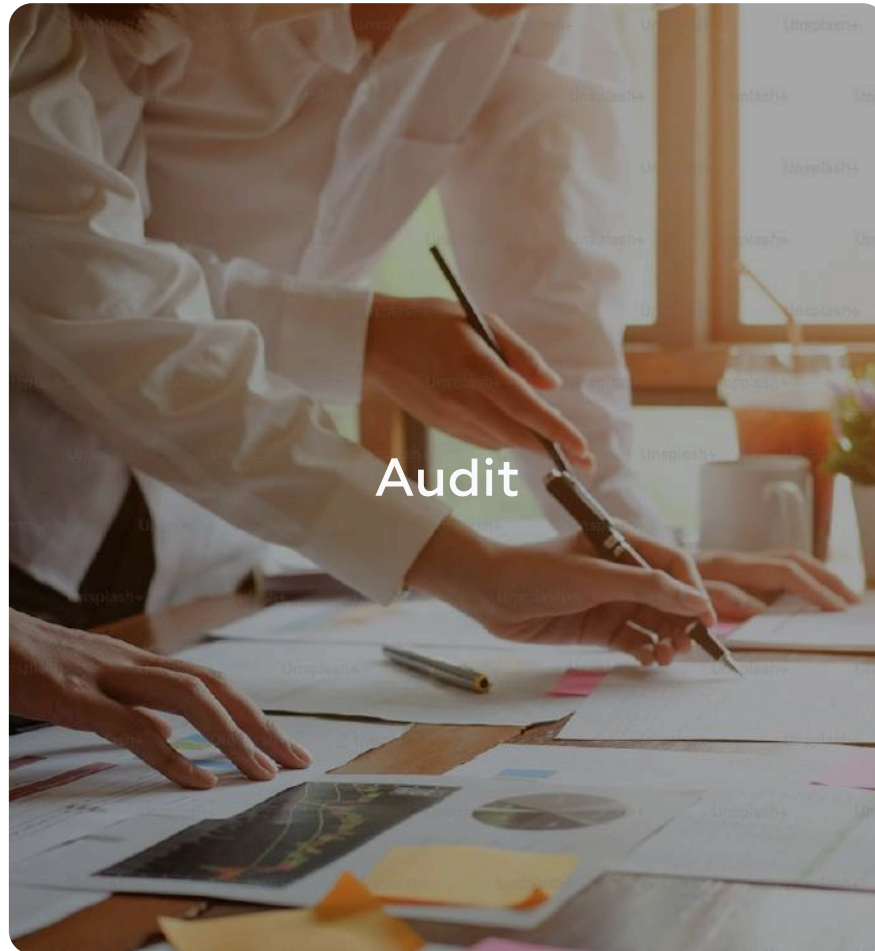

## Business owners

We help to optimize operational processes. We increase the productivity of your company, reduce production costs, which ultimately increases the profitability of your business

## Our Competencies

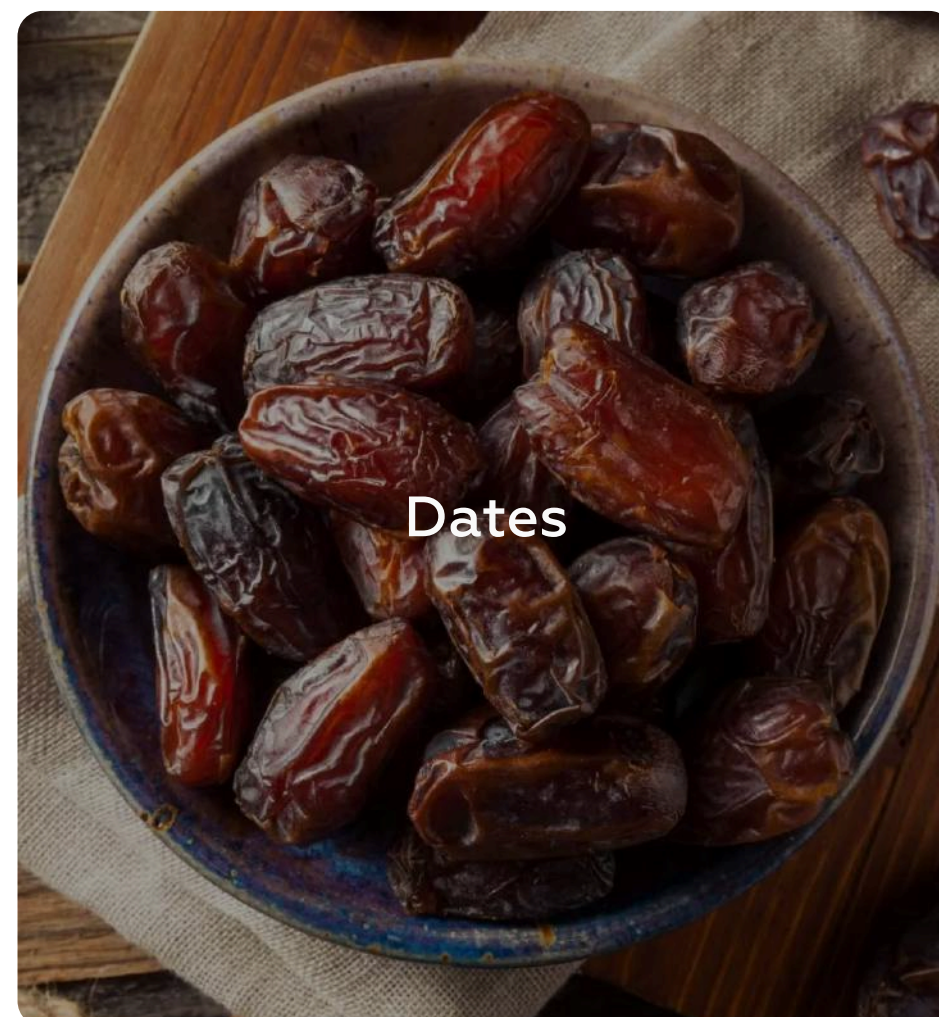

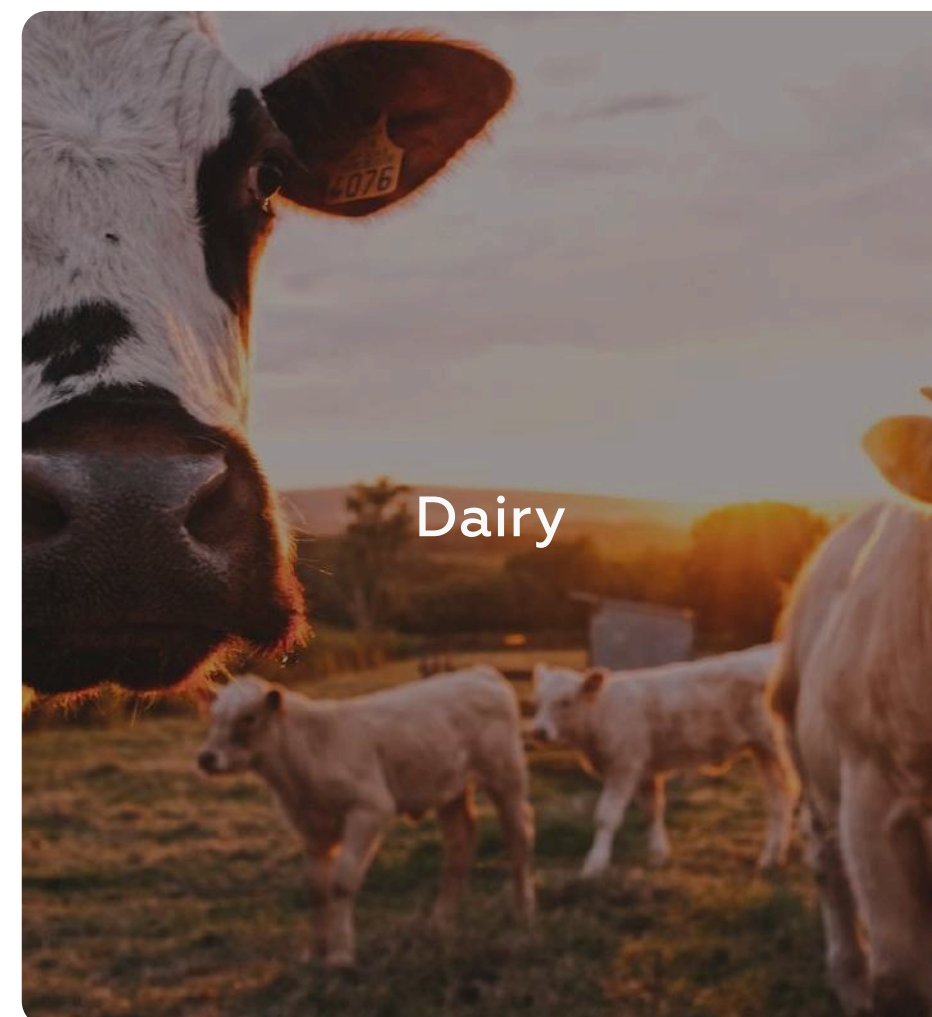

## We make solutions for

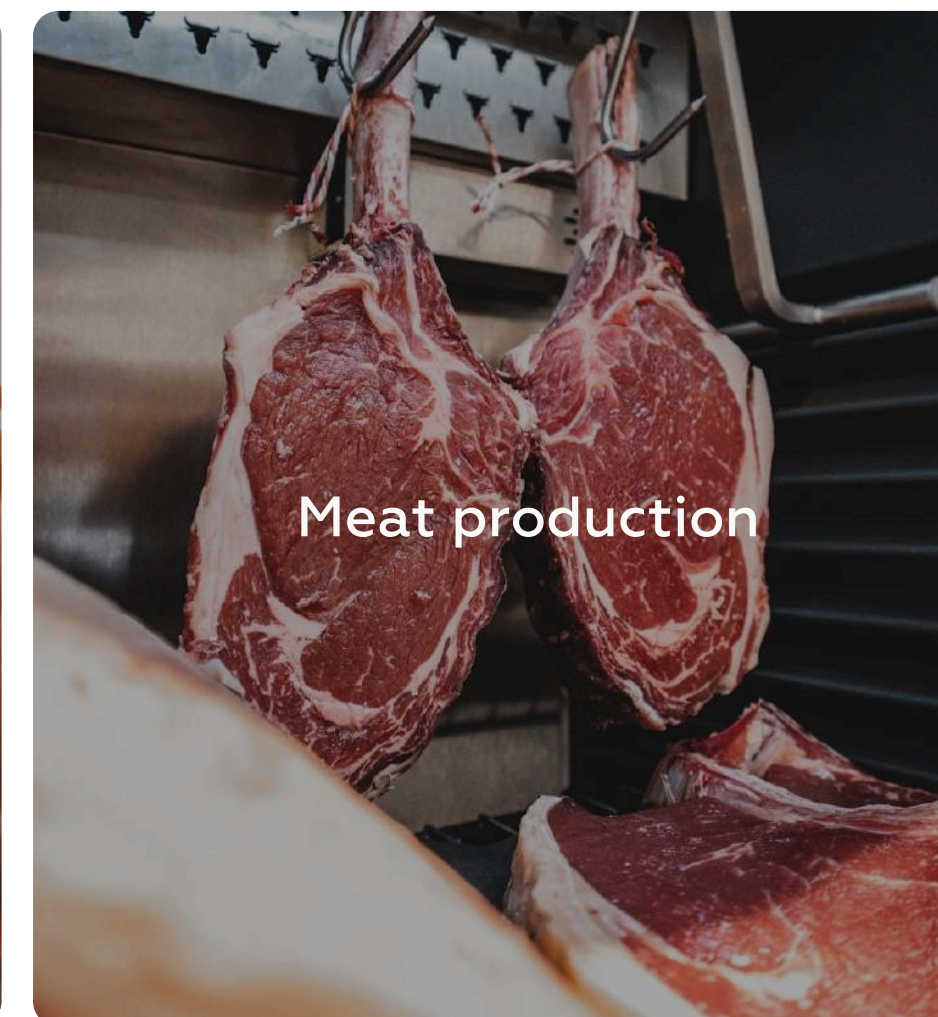

Poultry

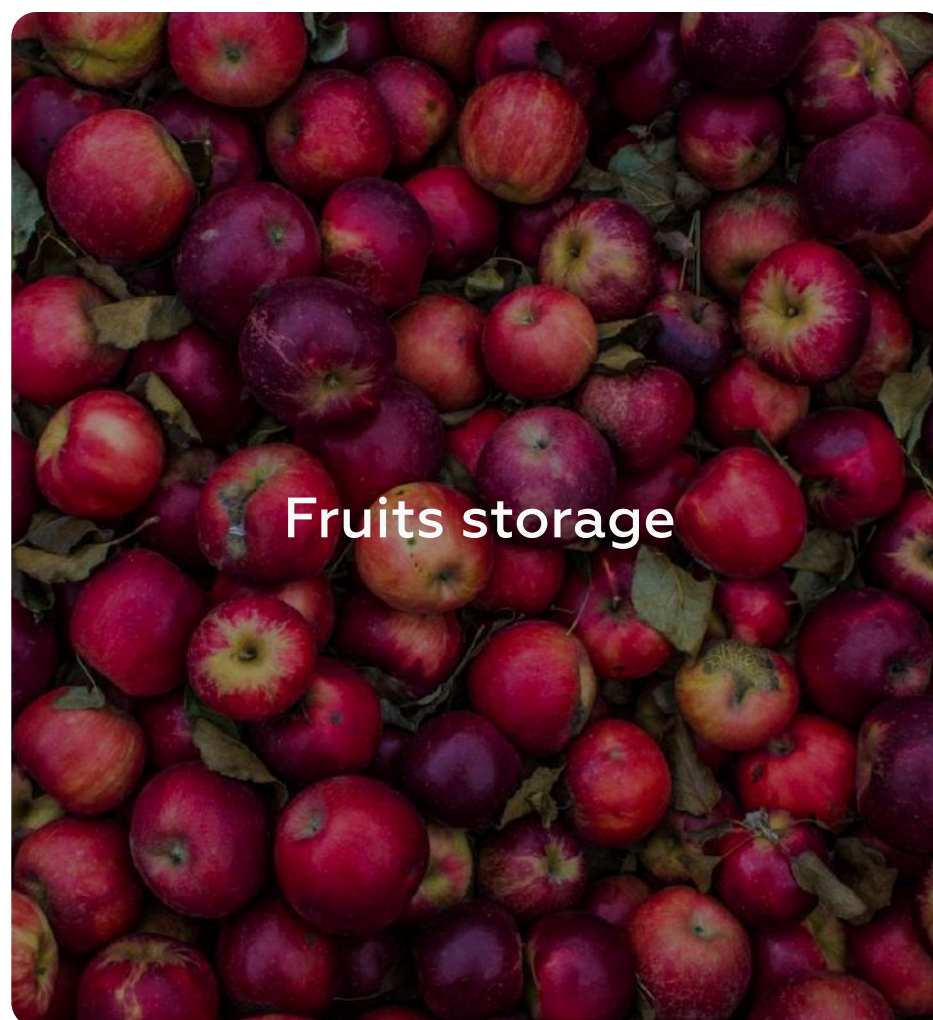

Dates

Dairy

Meat production

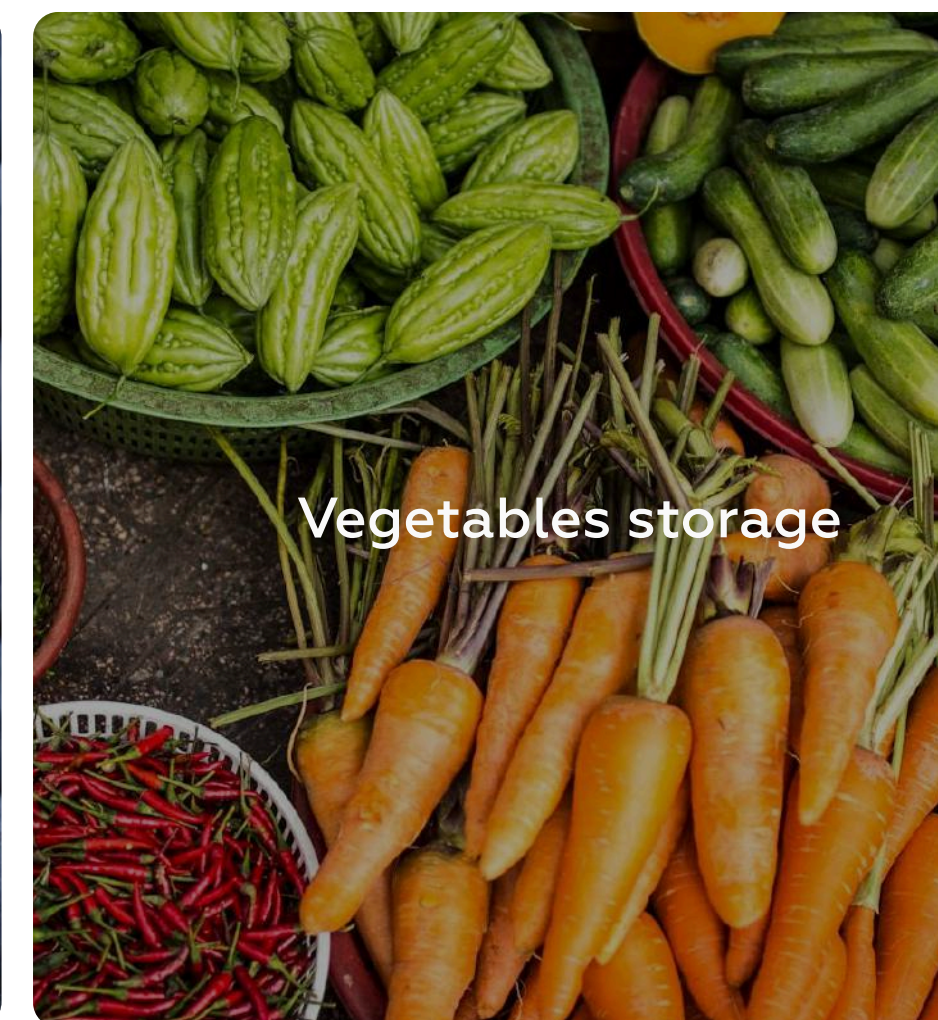

Fruits storage

Greenhouses

Berry cooling

Vegetables storage
